

## INTRODUCTION

Abdelmalek Essaadi University stands out as one of Morocco's leading public institutions, firmly committed to meeting the needs of its environment and contributing to sustainable development. Officially established in 1989, the university's origins trace back to 1982 with the founding of two higher education institutions in Tétouan, which laid the foundation for what would evolve into a nationally and internationally recognized center of academic excellence.

The university is named after the Saadian Sultan Abu Marwan Abd al-Malik, renowned for his decisive victory at the Battle of Oued El-Makhazine. Strategically situated between the Mediterranean and Atlantic coasts, just 14 kilometers from Spain, Abdelmalek Essaadi University benefits from a unique geostrategic location. This position makes it a natural crossroads for cultural exchange and a key player within one of Morocco's most dynamic economic and industrial regions. As the country's second-largest industrial hub, the region attracts significant international investment and plays a critical role in driving national economic growth.

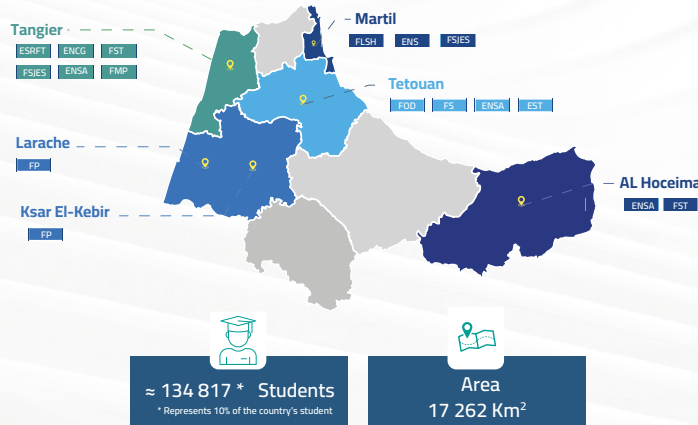

In this context, the university plays a vital role in developing human capital, fostering innovation, and supporting socio-economic progress at both regional and national levels. Today, the university consists of seventeen institutions across six strategic cities: Tétouan, Martil, Tangier, Larache, Ksar El Kébir, and Al Hoceima. Among its most recent developments is the inauguration of the École Supérieure de Technologie in Tétouan, created in response to the growing demand for technical skills in a region undergoing rapid industrial and technological transformation. This is particularly evident in the maritime sector and the digital sector.

Aligned with the royal vision of His Majesty King Mohammed VI—may God assist him—Abdelmalek Essaadi University places human capital development at the core of its mission. The institution is deeply committed to modernizing its academic and research programmes to better align with the needs of the job market. This involves strengthening professional training, promoting innovation, and supporting entrepreneurship and upskilling.

Through these strategic choices, the university seeks to empower students to tackle contemporary economic, social, and environmental challenges while ensuring their successful integration into the workforce. As an active agent in the process of implementing the recommendations of the New Development Model (NMD), the university is committed to professionalization, applied research, and innovation, while embracing digital transformation and internationalization to bolster its attractiveness to students and employers alike.

Finally, through effective governance and robust partnerships with economic and institutional stakeholders, Abdelmalek Essaadi University continues to develop a sustainable, inclusive model of higher education that supports regional development and anticipates the evolving requirements of its socio-economic environment.
